## Do you know 7 of 10 prefer disposable recycling tableware and packages?

In MonoUso we want to show you we respect and protect the environment. Customers watch on food quality but on materials of the tableware and disposable packages also. Customers expect them to be recyclable, compostable and biodegradable. We offer the possibility to make customers happy from first moment.

What if in addition to offering you biodegradable, compostable and reusable tableware and packaging, we offer you aesthetic and quality products? Nothing better to enhance your food and maximize your customer experience.

# Containers for NOODLES AND PASTA

Having pasta as the star of a takeaway business involves 3 minimum requirements: knowing the exact cooking point, presenting it properly and packaging it with care so that it reaches the consumer in perfect condition. Well, we can't help you cook it, but we are convinced that our packaging will help you send pasta al dente, as if it had just come out of your kitchen!

## ADVANTAGES:

- Made of materials resistant to liquids and grease.
- Sizes and capacity designed for portions of noodles, spaghetti and other types of pasta.
- Available with flap or lid closure.
- Available in a sustainable range of food grade cardboard, sugar cane, etc...

## DID YOU KNOW THAT...?

Pasta is considered a food that consumers turn to in times of instability. This has resulted in a growing demand for it in Take Away.

The wide variety of options on the market, the ease that apps provide, its status as a healthy food... betting on pasta in your business is a safe option. All you have to do now is provide a suitable container.

# Packaging for PANINIS AND SANDWICHES

Eating a sandwich is more than just an act of consumption: it is an experience. Contrasts between ingredients, the sound of the crunchy bread when you take a bite... and the feel. It is not the same to enjoy this sensation with a silver foil wrapper as it is with a package specially designed to accompany it and protect it from other incentives.

The big sandwich chains know this and have already opted for quality packaging, personalised and adapted to the needs of each product. We know it too and that is why we present you this section with selected products.

## ADVANTAGES:

- Manufactured with materials resistant to wet food and grease.
- Sizes and capacity designed for different types of bread.
- Available in packs or bags to take away.

# Packaging for HAMBURGERS AND HOT DOGS

Welcome to burger sector, the star food of take away and also the one that generates the most competition.

If you're here, it's because you've got a great burger supplier, a cutting-edge delivery service and an artisan kitchen that's second to none - just like your competition. It's true that what will put you on the consumer's radar is how good your burger is. That's why you need to ask yourself how to differentiate yourself from the start: your packaging.

Go for quality packaging, resistant to grease and transport, pleasant to the touch, attractive to the eye... and customers will bet on you.

## ADVANTAGES:

- Most competitive price on the market.
- Proven designs to enhance the natural beauty of the burger..
- Manufactured with grease resistant materials.
- Sizes and capacity designed for small hamburgers, XXL, Mega, giant...

## IT'S A FACT: IN PACKAGING, LESS IS MORE.

The big hamburger brands have accustomed us to overloaded and iconographically overcrowded packaging designs. It's no coincidence, because above all they are trying to sell their brand.

What do we recommend? If you have decided to go for a quality burger, don't overload your design: go for a minimalist and clean packaging. A design that draws attention to what's important: the food.

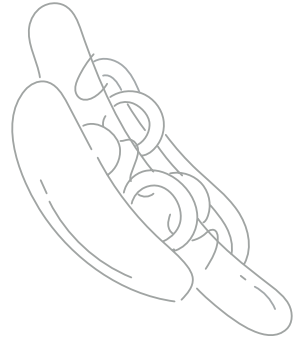

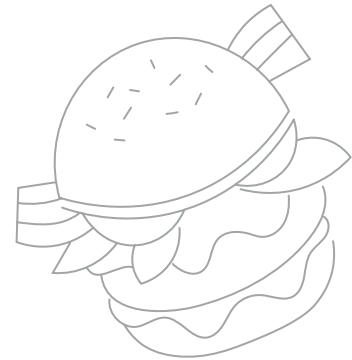

A kraft finish, newspaper, white... go for these solutions and you will win over your customers.

# Packaging for FRIES AND FRIED FOOD

Fried food is the friend you enjoyed the most when you were a child, but also the one that made you go home stained and uncomfortable. Jokes aside, any caterer knows what we're talking about: there's no point in making the juiciest fried chicken if the packaging is stained all over.

If you want your customers to think about how crispy and golden your fries are, you have to go for packaging that's up to the challenge of oil and sauces. So here are some of our top products for strength and presentation.

## ADVANTAGES:

- Made with materials resistant to grease, salt and sauces.
- Sizes and capacity designed for different portion sizes.
- Available in packs, bags or cones to take away.
- Available in a sustainable range of food cardboard, sugar cane, etc...
- Its finish enhances the golden colour of the fried food.

## DON'T FORGET THE SKEWERS!

You've already taken the plunge and opted for our fry packaging. Good for you.

Now it's time to bet on your customers' hands, isn't it?

You can't imagine how many orders you have lost because your potential customers have seen that you give your portions without a toothpick.

Everybody loves fries.

Nobody likes to get dirty!

## FRIED FOOD AND SUGAR CANE: A NATURAL ALLY.

Fried food and sugar cane: a natural ally. You probably already know that sugar cane is one of the most sustainable solutions in food packaging. What you may not know is that it is a perfect match for fried foods.

1. The feel of sugar cane is VERY PLEASANT. Nothing to do with old foam packaging.
2. The pastel colours of the sugar cane combine with the bright colours of the fried food.
3. It's a perfect material for food contact and up to the challenge of this type of food.

# Containers for SALADS AND FRUITS

It's a fact: cold food and vegetables have conquered the take-away market. Maybe the top orders still belong to other types of food, but if you don't offer a vegetable alternative on your menu, you are losing an important part of your customers.

At Monouso we understand this well and that is why we present you with our range of salad and fruit packaging, a category in which we have combined versatility, resistance to grease and juices, crystalline transparency to enhance the food and a wide selection of materials in which we include sustainable solutions.

## ADVANTAGES:

- Made from materials resistant to moisture and sauces.
- Different formats for tasting and portions.
- Perfect for self-service.
- Shaker type packaging available.
- Sustainable range of food paper board, PLA corn starch, etc... available.

Containers for Salads and Fruits

**PLA, PERFECT FOR COLD FOOD**

Our products are characterised by the fact that they are suitable for use with a wide range of foods. However, they are usually recommended for a specific dish. This is the case of PLA corn starch packaging, designed to be used within the cold food family, but with a special focus on fruit and salads. The reasons are clear:

1. They are the perfect ECO option, something that ties in with the sustainable nature of vegetables.
2. Their crystal-clear finish enhances the colour and freshness of the food.
3. They are just as hygienic and resistant as other plastic packaging.

# Packaging for SOUP

Who said selling broth to go is not a good idea? Tell that to the couple who gets a bowl of Ramen in January or those who enjoy a fresh gazpacho in August.

The question here is not about the suitability of soups as a take away product, but whether you can ensure that they will reach your customer's hands intact. Let us solve that dilemma: our soup packaging section includes ready-made products to give you the peace of mind you deserve.

\*We only guarantee the integrity of the packaging if the recommended conditions of use are respected.

## ADVANTAGES:

- No matter if it's raining or snowing, or moving on the delivery man's motorbike: these containers won't spill\*.
- Made of moisture-resistant materials.
- Retains the heat of the broth.
- Does not interfere with the taste and food properties of the food.
- Available in various common soup formats and sizes.
- Paper or plastic lids available.

## CHOOSE THE CORRECT LID

You will need a lid for your container and we want to make it easy for you.

Here you can choose the right lid according to the material you want and the diameter of the container, so you don't have to be afraid of making a mistake.

Also, remember that if you don't have the catalogue in front of you, you can always look for your container in our online shop. There you will find the lids compatible with the selected product.

From the shop to your mouth, no soup spills!

# Containers for DESSERTS AND ICE CREAM

What is more beautiful than a shop window full of colourful desserts? The brown of the chocolate, the red of the strawberry, the yellow of the cream?

Those of us who work with packaging know that visuals are key in confectionery, which is why our packaging is 100% crystal clear so as not to interfere with the presentation of your desserts.

You take care of sweetening our lives with your desserts, and we take care of packaging them!

## ADVANTAGES:

- Fully prepared to resist humidity and cold.
- They help to maintain the ideal temperature of the dessert.
- Crystalline finish to enhance visual appeal.
- Compatible with refrigeration/freezing.

## DESSERT IS MAGIC: LET IT SHOW!

People don't just come into an ice cream parlour or patisserie because they are hungry: they come in because they are or want to be happy. And we don't blame them: there is nothing more motivating than walking into an establishment and finding a row of colorful desserts waiting to be tasted. Therefore, we recommend that you never forget how important it is to display your product in all its glory.

## FOIL, THE ECOLOGICAL MATERIAL PAR EXCELLENCE

Did you know that more than 75% of the manufactured aluminium in circulation in the world has been used for almost 200 years? Due to its metallic and robust appearance, many people think that aluminium is not a sustainable option... Quite the opposite is true! Not only is it infinitely recyclable, but recycling it requires less energy than manufacturing it.

# Packaging for PASTRIES, CHURROS AND WAFFLES

There are two types of people in this life: people who love churros and people who love waffles. Well, let's not cheat ourselves: everyone likes this couple.

And as we at Monouso are fans of you offering it in your business, we have prepared a special section of wrappers for you to carry these delicious but oily foods.

## ADVANTAGES:

- Moisture, grease and heat resistant packaging.
- They help to maintain the ideal temperature of the dessert.
- Crystal clear finish to enhance visual appeal.

# Fast Food TRAYS

In the world of catering equipment, there are few clearer synonyms for reliability than trays. If we take the concept to take away products, fast food trays must be reliable and avoid slipping to prevent damage to your premises.

However, they should be light and flexible and fit in with your brand design.

## ADVANTAGES:

- Easy to transport and non-slip.
- Perfect for self-service.
- Easy to store by stacking.
- Available in bright colours that children will love or sober colours that will give a touch of elegance.
- Available in the most eco-friendly option, made with cardboard.

**THINGS YOU CAN TRUST**

In the world of catering equipment, there are few clearer synonyms for reliability than trays. If we carry the concept over to take away products, fast food trays need to be reliable and slip resistant to prevent damage to your premises.

However, they must be light and flexible and fit in with your brand design. Is it difficult? No, not at all! Take a look at our takeaway tray catalogue.

Do you want more information?

# Stands and basket for PRESENTATION

The best friend of a tasty meal is a good presentation, because yes, food also "enters through the eyes". Accompany your recipes with baskets, bowls or mini fryers to give them a very appetising touch that will delight your customers.

Combine the different options of stands and baskets that we offer to give your dishes a unique touch. The presentation can be accompanied by absorbent paper or directly in the basket itself, which option will you choose?

## ADVANTAGES:

- The perfect size for one or several portions.
- Easy to clean.
- Durable and lightweight materials.
- Different designs to suit all kinds of needs.
- Can be used on customer tables or as displays at the bar or counter.

**EFFICIENCY PAYS OFF**

Choosing set stands does not only guarantee aesthetic value: it also improves the efficiency of your premises.

Do you have a preparation station? Place a stand for your employees to order snacks. Do you have a self-service? Place it in a strategic location and let the magic happen.

## STANDS FOR YOUR CREATIVITY

These stands are not limited in their possibilities; don't you think they are the perfect option for displaying any innovative snack you want to show off? Maybe you want to use them to prepare a welcome aperitif in the foyer of your premises? What about a basket with sweets?

# Take Away CUPS

It is very important that a take-away cup recreates an experience as close as possible to what it would be like to enjoy a drink in your local. However, we know that there is something else that matters more to you: the durability of the cup.

There is nothing worse than receiving a complaint from a customer who has not been able to enjoy their drink or, much worse, has been burnt by the spilt contents.

Good news! At Monouso we only deal with products under our seal of quality, so all you have to worry about is making a coffee that will knock your socks off.

## ADVANTAGES:

- We adapt to every taste. Each person likes to drink coffee in a different type of cup and we have the ideal one for you.
- Specific cups for each drink capable of maintaining the temperature.
- Materials with a soft and pleasant touch..
- We have ecological formats.

# Take Away CUTLERY

Tools are not for playing with. Cutlery is the tool with which we enjoy a good meal. Your customers want to enjoy the investment they have made in their order. Do you understand where we are going?

We know that a broken fork can become the cause of consumers switching to the competition next time. That's why we only work with materials that offer a very high guarantee in terms of strength to cope with the most seemingly difficult dishes.

No matter the challenge: for snacking, tastings, heartier dishes... below you will find the ideal cutlery for every option.

## ADVANTAGES:

- They are very resistant. The cutlery in our catalogue adapts to the most difficult foods.
- They cover different styles. Whatever the theme of the event, we have the ideal option.
- Much more than just knife and fork, we have specific cutlery for tastings, snacks, etc.

## A KEY DETAIL

Consumers are increasingly analyzing the materials used by brands, especially in the take away sector. And what material stands out more than bamboo? It may seem like an unnecessary investment, but we assure you that including bamboo cutlery can be the push that leads a customer to repeat in your business.

## POLYSTYRENE, THE CLASSIC

There are several reasons why we associate disposable cutlery with polystyrene:

1. It is a very economical material (something very important for the hotel and catering industry).
2. It is very easy to recycle.
3. It is one of the most hygienic solutions.
4. Their resistance makes them very versatile cutlery.

We invite you to innovate with us, but don't forget that the classics will always be there.

# Take Away NAPKINS

Hygiene and customer comfort is one of the priorities for any business, so don't forget about napkins! At Monouso we offer a wide variety of designs; from bright colours, through geometric patterns to plain or plain colours.

From the many sizes you can choose the perfect one to incorporate them into the Take-Away packaging you normally use, we also include the "Eco-friendly" option where the paper has been manufactured respecting the environment, is completely ecological and decomposes easily.

## ADVANTAGES:

- Wide range of colours to customize each event.
- Different sizes to adapt to the size of the banquet.
- Eco-friendly option with recycled paper.
- Very soft and pleasant touch for the consumer.
- Resistant material that allows a longer use of each unit.

## WHAT IS AN ECO NAPKIN?

It may seem redundant, but there is more to an eco paper napkin than meets the eye.

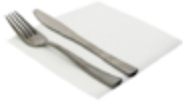

This product is not only made from recycled paper, it also complies with a series of requirements regulated by the European Union regarding the consumption of natural resources. Therefore, ECO napkins are sustainable from the moment they are manufactured until they are used by your customers.

## CONTRASTS AND NATURAL COLOURS

Following trends in hospitality is always a good idea and the best way to measure if a business is going for it is by looking at the napkins.

The latest trends dictate that natural colours, such as sand or cement tones, are in. You can meet this trend with our eco-friendly models.

Contrasts are also in, so if your brand is going for blue, top it off with the complementary orange napkins. Is it green? Go reddish - don't skimp on resources to make your mark!

# Take Away BAGS

There is a big difference between the order arriving home in a half-broken bag that is difficult to transport or in a resistant container, adapted to the product it contains and that attracts attention. Regarding this second option, we know that finding a supplier that is capable of giving this added value to the take away of a brand seems difficult. At Monouso we focus all our dedication on achieving bags that are fully guaranteed for your customers and that also fit in with the branding of your organisation. Because don't forget that what you want to express with your brand is seen from inside and outside the bag.

## ADVANTAGES:

- Resistant bags that even if they contain a significant weight for a period of time, they will not let you down.
- The shape is designed to keep the contents stable.
- Easy to handle, even if you are in a hurry and loaded, they open quickly and easily.
- The different varieties allow them to adapt to the different products to be transported.
- They are easy on the eyes. Their handcrafted design gives them a good presentation.

## THE FASTEST GROWING BAGS

The use of paper bags in Spain has increased by 35% during last three years, an advance that currently translates into the following statistic: its percentage of use with respect to the total consumption of commercial bags already exceeds 25%. These are data that endorse the future of bags that perfectly combine usability, design and sustainability.

## WHY PROTECT BREAD IN A PAPER BAG?

Storing bread in a paper bag to make it last longer is a classic, but is there a scientific explanation? The answer is yes.

It is an ideal wrapping because the paper allows moisture to be released. This allows the bread to breathe better, thus preventing the formation of fungus.
